Start with <b>Two</b> magazines with <b>five</b> rounds each.</li> <li>2. Fire <b>five</b> rounds strong hand, two-hand grip, reload, fire <b>five</b> rounds off hand, two-hand grip, interview/crouch position. <b>(25 seconds)</b></li> <li>3. Reload and scan at lowered ready position.</li> <li>4. Holster and secure an empty pistol.</li> <li>5. On command, remove any magazine and clear, holster and secure an empty pistol. Download magazines if needed.</li> <li>6. Score target. Record on tally sheet. (112 Required)</li> </ol>

### Instructions:

All firing in this course should be done using a two-handed grip unless otherwise annotated.

Three (3) magazines are required for this course.

Due to the variety of holsters and carrying positions, for safety reasons all stages will begin **EITHER** with the weapon in a holster located at the shooter's waist **OR** with the weapon in the strong hand, the muzzle in Sul or Low Ready (at the instructor's discretion), with the trigger finger OFF the trigger, outside of the trigger guard, and registered on the frame of the weapon. After firing at all stages, shooters will maintain proper muzzle control and trigger finger management while scanning 360° for additional threats, and holster if applicable.

Factory-new ammunition (either duty or practice/range ammunition) may be used for this phase. Note: Practice/Range ammunition is permitted for qualification if it is of the same manufacture and the same grain weight the individual intends to use as carry ammunition. Shooters will fire the course with full magazines/cylinders and reload as necessary with no additional time accommodations.

If necessary, to alleviate safety concerns for a specific shooter, firearms instructors may modify some portion of this course, but must document any modifications and immediately notify MPOETC of any modifications.

Prior to beginning the qualification, instructors should use a black marker to clearly mark a 6" circle on the target for each hip area as indicated in red on the next page. Instructors should explain to the shooter the rationale for using shots to the hip as an alternative when shots to the body or head are not effective.

**Total – 30 Rounds on a TQ 21 target scored 5-3** (Score shots inside the lined area of the target, to include the head, and hip area circles at 5, all others on silhouette at 3, all shots outside the silhouette are scored 0 points.) **or TQ 15 target scored 5, 4, 1** (Score shots inside the inner most rectangle area at 5, the outermost rectangle at 4, all other hits in the silhouette at 1) **(Possible 150 points)**

**75% or 112 points must be attained to successfully pass this course.**
